## Summary

I am an Information Technology student with an interest in backend development. I completed a 3-month internship at DC Web Design Company and have built personal web projects using React, TypeScript, Node.js, and Express. I am looking for a backend internship to improve my skills, learn from a team, and help build useful web applications.

## Education

### Ho Chi Minh City University of Technology (HUTECH)

Major: Information Technology

Specialization: Software Engineering

## Technical Skills

**Programming Languages:** JavaScript, TypeScript, Java.

**Frontend:** React, Vite, CSS, React Router.

**Backend:** Node.js, Express, REST APIs, JWT authentication, Socket.io.

**Databases & ORM:** MySQL, Supabase, Prisma ORM.

**Tools & Concepts:** Git, GitHub, Swagger, MVC architecture, responsive web design.

## Work Experience

### DC Web Design Company

3 months

*Intern*

- Learned the basics of WordPress.
- Practiced building web layouts with HTML and CSS.
- Helped build landing pages based on reference designs.
- Uploaded project data to the company's system.

## Personal Projects

### Nurfia Fashion eCommerce (web\_nurfia)

Personal project

*Full-stack Fashion Shopping Website*

A fashion shopping website with a customer store, an admin panel, and a backend API. Customers can shop and track orders; staff can manage products, stock, and sales.

**Tech stack:** React, TypeScript, Vite, Node.js, Express, Supabase, Prisma ORM, Socket.IO.

#### Responsibilities:

- Built REST APIs for products, carts, orders, and stock using Express, Prisma, and Supabase.
- Added login with JWT in HttpOnly cookies, password hashing, and email OTP.
- Added role and module permissions for staff, with access checks in the backend.
- Added CSRF protection, rate limits, input checks, and session revocation.
- Added COD, bank transfer, MoMo, and Stripe, with payment signature and amount checks.
- Built admin pages for products, stock, orders, customers, staff, and reports.
- Used Socket.IO for live notifications and order status updates.
- Connected Cloudinary for images, SMTP for email, and an AI API for chat and content support.
- Built a responsive interface with light/dark themes and English/Vietnamese options.
- Hosted the backend on Render and provided API documentation with Swagger.

### Tong Van Hoang Portfolio

Personal project

*Personal Portfolio Website*

A personal website to share my profile, skills, CV, technical blog, and Nurfia project case studies.

**Tools & services:** TypeScript, Upstash Redis, AI API, Vercel.

#### Responsibilities:

- Built pages for projects, blog posts, CV, FAQ, and contact messages.
- Wrote case studies for the Nurfia storefront, REST API, and admin dashboard.
- Added an AI FAQ assistant with English and Vietnamese messages.
- Used Redis to limit AI requests by IP, with a shared counter across server instances.
- Added a wait timer that stays active after page reloads and syncs across tabs.
- Organized content, components, API routes, tests, and docs into separate folders.
